Hiring Manager

Subject: Application for the Position of Backend Engineer / Java Developer / Spring Boot Developer

Dear Hiring Manager,

I am writing to express my interest in the **Backend Engineer / Java Developer** position at Capgemini With **10.9 years of IT experience**, including **5+ years specializing in Spring Boot and microservices development**, I am confident in my ability to contribute effectively to your engineering team.

In my last role as a **Consultant at C-DAC/NATGRID**, I design, develop, and deploy scalable backend systems using **Java 8/11/17, Spring Boot, Spring Cloud, and REST APIs**. I have engineered microservices for high-traffic environments, implemented secure API authentication with **Spring Security & JWT**, and built event-driven components using **Kafka**. Additionally, I have hands-on experience with **Docker, Kubernetes, AWS, EC2/ECK, CI/CD pipelines (Jenkins, GitHub Actions)**, and monitoring tools such as **Prometheus, Grafana, and ELK**.

Previously at **Wipro**, I developed backend modules for government and enterprise applications, implemented error handling & monitoring mechanisms, and resolved production-level issues with high efficiency. Across all roles, I have consistently demonstrated strong problem-solving abilities, a deep understanding of backend architecture, and a commitment to delivering clean, high-quality code.

I bring a blend of strong technical skills, production support experience, and a proactive approach to ownership and accountability. My ability to collaborate within cross-functional teams and adapt quickly to changing requirements makes me a strong fit for dynamic engineering environments like yours.

I am excited about the opportunity to contribute your organization and would welcome the chance to discuss how my background and expertise align with your team's needs.

Thank you for considering my application. I look forward to the possibility of contributing to your organization.

Warm regards,
Arun Kumar Yadav
